Souvenir Edition **TRADEWINDS**

Introduction

"This book has been prepared especially for the members of the 48th SeaBees and their families and friends. Some of the material contained here is not suitable for general release to the public press and radio until the end of the war. It is requested that none of the contents be made available to the public press or radio."

This small book is surely not meant to be a full record of the accomplishments of the Forty Eighth Naval Construction Battalion . . . It contains merely a few articles, drawings and photographs that deal with the stage of our tour that started in May, 1944, and ended in April, 1945!

In the future, as you glance through its pages, we hope that you will be reminded of some of the adventures, work, laughs and fun that befell you while you were a member of this Battalion . . . !

If this is accomplished, then we are truly proud of our part in this book.

The Staff

Commander
Joshua T. Davis
CEC USNR

A MESSAGE TO ALL HANDS:

As this book is being published, the 48th Batallion has seen active service for more than two years. This time has been filled with many heartaches and much arduous work under the most trying conditions.

Your accomplishments speak for themselves. They have repeatedly brought forth praise from officers commanding units of the Army, Navy and Marine Corps for whom this Battalion has built extensive projects in record time. Even though military security would permit it, a list of work you have accomplished would be too long to permit printing in a book of this nature.

The war is not over and this Battalion is continuing with its assignments with the same determination and singleness of purpose that has always characterized its work. This spirit will prevail until our enemies shall lay down their arms in unconditional surrender.

Your skill and devotion to duty have been in keeping with the finest tradition of the SeaBees. Your accomplishments have been a constant source of inspiration to your Commanding Officer. I extend to you my heartiest congratulations.

J. J. Davis

Executive Officer
December 1942 — January 1945
Charles F. B. Thiede
LT. COMDR., CEC, USNR

Executive Officer
January 1945
Edmund Hollender
LIEUTENANT, CEC, USNR

To the SeaBees

... "That we have accomplished our assignments to the satisfaction of those in authority is attested by the commendatory statements which we have received from the top command in every theatre of war. Ours have been the duty and the privilege of participating in every major amphibious operation conducted by either the Army or Navy throughout the world. Our SeaBees have taken a prominent part in every assault in the Pacific Ocean, in the operations in North Africa, in Sicily, in Italy, and in the Normandy invasion, and they have conducted themselves with honor and distinction . . ."

Excerpt from a speech delivered at
Davisville, R. I., by
ADMIRAL BEN MORRELL
CEC U. S. N.

***HAWAIIAN
ISLANDS***

The order on the bulletin board screamed it's message . . . "secure all jobs and pack your bags . . . stand by for further orders!"

Many months had passed since the day we landed on this island! We had arrived as boots fresh from the States, and its peaceful, emerald-like appearance had seemed exotic and exciting to us then. It didn't take long for us to buckle down to the many important jobs that we had been ordered here to do. In our free time we soon learned our way about the Island . . . became acquainted with the happy-go-lucky natives!

But now we were leaving! We didn't know where we were going and most of us agreed that our next stop would not be nearly so pleasant—few were reluctant! Perhaps if we had known what was in store for us, we would not have been so eager!

In the first place, we were not scheduled to leave the 'rock'! Oh, no! . . . ! We jammed our gear into our bags and filled the GI cans with the surplus! We loaded ourselves into busses and trucks and proceeded — not to an awaiting ship, but to a camp high on the hill!! 'Camp Snafu'!

We had built this place! We knew every inch of its roads, every board in its buildings, every sheet of iron in its Quonsets! We had spent weeks constructing this camp but none of us ever dreamed that we would be using it to train ourselves for combat!

This camp was not quite what we had been used to! We had left nice roomy barracks for drafty

EXTENDED ORDER—
....KEEP YOUR HEAD DOWN....

tents—spring bunks for cots—pavement for mud and dust—hot water for ice—and a trip to the head was an excursion!

We had taken many tough job assignments in an easy stride but now our assignment was mostly just walking! We walked up and down hills—through mud and dust. Our feet howled in dismay and blisters were the order of the day! When we became hardened to this, they proceeded to break down our arches by issuing full packs! Full packs are dehydrating moving vans of canvas. Its straps are especially designed so as to cut your arms off neatly at the shoulders! Naturally, all this weight on our backs tended to throw us off balance but there was an answer for that too! We counter-balanced ourselves by hanging canteens, pieces, gas-masks, ammunition and hunting knives in front which left us with the equilibrium of a quart bottle balanced on its neck.

If you will remember, another interesting little experience we endured was our overnite hike!! (Overnight hikes are great fun if one goes in for torture!) We started one day at about 1300 and that evening we bivouaced on the side of a mountain many miles from Camp. We were dog-tired and our feet were covered with blisters. We put our shelter-halves together to form pee-wee tents, wolfed down a tasty can of "C" rations and hit our sacks . . . sacks that were nothing else than ol' mother earth with a few rocks strewn in to make your sleep more pleasant!

It seemed that old Sol had no sooner disappeared than they routed us out to take a little excursion through a bamboo forest! It was dark and we ached all over and no one cared to see the bamboo forest; but we had come out here on a conditioning hike and they were giving us the works! The sun was just peeking over the mountain when we arrived back at the bivouac! We all had ravenous appetites which were promptly appeased by another tasty can of "C" rations (Yes! Yes!) . . . Then we started back!

None of us will forget that part of the hike! The sun was in a sadistic mood and beat down mercilessly! Our already swollen feet strained against our shoes and if we took them off, we couldn't get them back on again! Smug corpsmen in zippy jeeps dashed back and forth to gather up the lame and exhausted. We walked in fifty minute periods and rested ten. (It was rumored that the rest period was used to bury the dead!) When we finally filed past the sentry at the camp's gate, he gawked at us as if we were a band of weary pilgrims finishing a thousand mile journey (and who says it wasn't???)!

Our days were now numbered! We all knew we were

about to shove off for a new assignment . . . Where this would be, we did not know but speculation was rife! A few optimistic characters even thought we might go home!

Tropical gear was issued . . . Sun helmets, mosquito netting, insect repellent, water purifier! Ammunition was issued and target practice occupied our time — rifle, B.A.R., machine gun, mortar, twenty millimeter! Aircraft identification . . . endless training films. We stripped our bags to actual necessities and sent home our dress blues . . . And then the departure day arrived!

We milled about the dock impatiently. A curious crowd of natives stood by to see us off. Many of us had friends among them—friends we would never see again. As always, we waited and waited and then finally we trudged up the plank of that huge, grey Dutch ship that nestled the pier. There was no fanfare—no band playing 'Aloha'—just the sound of the officer's voice who read off our names as we went aboard! . . . Almost before we knew it, we were headed out to sea!

That evening, as the setting sun splashed the sky with color, we gathered about the rails to get our last view of the Island that had been our home for almost a year and a half! It was but a blob of green in the water and to see it that way made it hard to believe we had done so much there! We felt no regret but all of us nurtured vivid memories . . . Luaus and Hulas, green cane fields and waving palms, late breakfasts at Mary's restaurant and thick steaks on the mountain, hilarious liberty parties and shore patrol skirmishes! And then there had been the long hard days of work and the lonely, monotonous nites!

We were on our way . . . excitement reigned!!

...Aloha!!

THE VOYAGE

She looked big as she lay there at the dock! Men swarmed in, over and around her—doing all the last minute things that signaled she was going on a long voyage! She was our ship—the one who would carry us deep down into an action-filled ocean. She was an Army transport but because of security reasons, we cannot give her name. For the sake of our story, however, we will call her the 'Rhubarb'!!

We filed aboard the 'Rhubarb' with full pack and duffel. Across her cold steel decks and down a hatch we went! Deep down in her insides! The hold was large and filled with tier after tier of bunks! This was to be our home for weeks to come! (If we had actually known how long, we probably would have not been so eager)!

It wasn't long before ol' 'Rhubarb' eased away from the dock and headed out the stream. She was only one of a convoy and the escort ships zigged and zagged about us like snappy little terriers! As the Island grew dim behind us, a plane roared by flaunting a target sleeve and the gun crews unlimbered their guns for one last practice shoot — the next could easily be the 'McCoy!' . . . And so we hit the sack that nite with the staccato bark of the guns still ringing in our ears!

The Captain of the 'Rhubarb' was a sea-going character whom we shall not soon forget! His broad Irish face beamed like a lamp and his forehead extended from his eyebrows to the nape of his neck.

A pair of shoes, a pair of shorts and at times a handkerchief on his bald pate constituted full uniform for Captain Murray.

His agility reminded one of a live rubber ball and his contour was not unlike one either! As he bounced to and fro across the bridge, bellowing at his crew, he reminded one of some great actor playing on a huge stage!

"... Chips!", he would rage, "Dammit, Chips, watch me back here . . . how much chain ya' got now, Chips?" — And then, "Ditto, ditto . . . and ditto!" (Whatever that meant). " . . . Oh, Sergeant Guthrie, this is th' Captain speakin! — Turn the 'phono' on, Sergeant, turn the 'phono' on an' give the boys a little jive."

Yes! Captain Murray was indeed a character! One minute he would be tossing chewing gum down to the boys and the next he would be threatening to skin 'em alive if they didn't stay off the life rafts! . . . "Get down off that boom! . . . That's a nice boy!"

The simplest daily functions assumed major proportions on board the "Rhubarb!" Chow call was twice a day but we spent hours in line to get it. There was supposed to be a chow line system—complete with chits, but this was just a waste of pasteboard. Everyone tried to be first and line-chiseling flourished!

We would fight and claw our way down into the steamy, almost unbearable hot mess hall and then try to eat as fast as possible so as to escape topside to the fresh air! Most of the time the mess hall was so packed that you wondered if you would get through the scullery before you melted to a pool on the deck!

The food — well, at first it wasn't so bad but then we started running out of things! We drank coffee without sugar — then there was no coffee! The bread got moldy — then there was no bread! If you will remember, we did not run out of rice!

Potatoes came in one variety — boiled in their jackets. You would have given five dollars for a plate of crisp brown French fries. The cooking of eggs showed equal ingenuity. You were given your choice — fifteen minute eggs, case hardened, or — none at all. The method of preparing bacon was new to all of us. None of this dry crispy brown stuff; it was boiled to resemble strips of blubber.

Taking a bath aboard the ol' 'Rhubarb' was really something! The showers came equipped with the best salt water available. Salt water showers give all the appearances of a real shower but when you emerge from your bath, you find that instead of losing dirt you have only gained a layer of salt! Your skin feels like a piece of number two sandpaper and your only solution was to try and wipe the whole deal off with your towel!

Then there were the simple little chores of washing your teeth and shaving. Sometimes you managed to pilfer a little fresh water from the stingy scuttlebutts for these duties but usually you resigned yourself to using brine! Toothpaste has a very peculiar, if not interesting, chemical reaction in salt water! It curdles and turns to a substance like putty — and is about as effective. Shaving cream, or soap, also reacts strangely with brine . . . it forms a lumpy residue not unlike oatmeal mush! — This leaves your beard in such a state that you remove it only by taking skin and all!

Going to bed was not just another ordinary function

either, aboard the ol' 'Rhubarb!' You had two choices — lying down in the hold amidst the foul air and sweating out the nite or going topside and flapping down on the steel deck to sleep in the fresh air — and the rain! Most of us preferred the latter. Many gave up sleeping altogether and adjourned to the 'casino' which was in reality the galley turned into a club.

We had no special duties on the voyage excepting to answer a few musters and serve in the galley once a week! Those who failed to answer muster were punished by being made to help clean the heads. Every other morning, immediately after muster, we had calisthenics! Being as the deck was so crowded, this was indeed a sight to see! When you bent over — contact! Arms spread, legs apart! Contact! Result? Hilarious!!

The Ship's Chaplain was an Army Major! He organized shows, boxing matches, contests and Bible classes! While we stood at anchor, we were allowed movies on the open decks! The films were just one jump ahead of silent films but we stood in the rain for hours to watch 'em! No one has ever been able to figure out why it always waited for show time to rain! When at sea, we saw the movies in the holds and when they were over, it was each man's duty to wipe up his pool of sweat!

Some mates worked while aboard and for this received the special award of eating with the crew. The rest just spent their time playing cards, reading, getting sun-tanned or just 'shooting the breeze'! Everyone had his special spot on deck where he promptly settled for the day. Occasionally, some 'squatter' would move in on some other mate's spot and friction would result! On the whole, though, it is amazing how so many men, jammed so close together, managed to keep from slaying one another!

During our stopover in the Marshalls, we were allowed ashore several times for a swim and a chance to stretch our legs! These few trips ashore were pleasant breaks in the monotony! These islands had been the stage for history making battles only a few months before! Only the jagged, shell-blown palm trees bore evidence of those battles. Many of us gathered sea shells to keep as souvenirs . . . Carried them back to the ship and stunk up the whole place with 'em!

And so the days went by, and at times the monotony was almost more than we could bear! Any slight change was an event and the whole ship sighed with relief when the hook was raised and we started on the last leg of our voyage!

We knew that our destination was one of the Marianas Islands! We also knew it wasn't going to be any picnic. Tension increased and the convoy increased its evasive, zig-zag course!

Several days later we all saw a living drama that we will probably never forget! The Island that was soon to be our home could be seen in the morning haze and it was in the throes of battle! Fighting ships of the Navy stood miles off shore and poured in tons of explosives! You could see these charges arcing through the air — balls of fire racing to do their work.

Smoke rose in columns from the blasted island and we mentally pictured the terrific struggle that was going on! Men were killing and being killed! Night and day the battle raged and we stood by — ready to go ashore! This waiting was the hardest of all! It gave us too much time to think and some of our thoughts were not pleasant!

Then suddenly our voyage was over! We prepared to go ashore! Some of us were filled with anxiety, some curious, some just plain scared! None of us were reluctant! Almost two months ago we had boarded the ol' 'Rhubarb' and we were sick of her! Sick of the sound of 'Walter' — sick of the sight of nothing but water — sick of scrambling down the gangways to claim a single orange — sick of the hot, tasteless water that trickled from her scuttlebutts!

We were going to face mud, rain, dust, heat, snipers and God knows what, but we were all ready — and eager!!

MARIANAS ISLANDS

We climbed from a Higgins boat onto what was once a dock. Now it was nothing more than jagged pile of coral reaching a short distance into the bay! What was left of destroyed Jap planes and boats could be seen everywhere in the water! Piles of rubble marked where buildings once stood and all that remained of a huge fuel-storage tank was a big, twisted pile of steel. The tall palm trees had been bomb-blasted into naked, charred stumps and huge shell craters pocked the landscape. Through this mess of destruction a bulldozer had cleared a path and trucks plowed back and forth to keep the supplies and men moving . . . And so we were introduced to our new island!

As the trucks carried us to our temporary bivouac area and we silently viewed the endless scenes of destruction, all of us were conscious of the odor that hung in the air — the odor of death! We had all expected conditions to be rough but few of us really expected such scenes as these!

Our bivouac was not far from where we came ashore. It seems that the best bivouacs are built in mud! . . . Ours was one of the best!! Every passing cloud deluged us with rain and the soft topsoil immediately churned to mud! After each cloud, the sun doubled its efforts and the rain turned to steam and the mud to dust! The air was alive with mosquitos and insects but most of all . . . the flies! Huge flies that were everywhere — in everything—and your body recoiled when they landed on you because you knew from whence they came!!

One might think that a bivouac would be an orderly place but it isn't. When a thousand men take all their gear into a confined, swampy area, and erect pup-tents, the result is something like a cross between a 'hobo' camp and a city dump! Trenches were dug everywhere to divert the torrential rain but did absolutely no good! Palm fronds, old broken boards, sheet iron and canvas — anything that offered added shelter — was used to supplement the shelter halves and still the rain and dampness seeped in to leave your mattress, bedding and belongings in a wet sodden mass! We soon found that

mildew was claiming everything we owned!

No one need remind us that living in that bivouac was hell! It was part of the hardships that had to be endured! We cooked our own meals — ten-in-one rations — over sputtering, smoky fires. We bathed in our helmets, but trying to wash clothes was out of the question.

Most of us were attacked by the cursed dengue fever and very few of us escaped dysentery! We only went through the motions of sleeping because being half afloat and visited by mosquitoes, rats and land crabs, there was always the 'Carbine Chorus'!! This started every evening at dark and continued throughout the nite! The jittery guards poured out the lead! On one memorable occasion, the 'enemy' was found the next morning in the shape of a cat! It was quite riddled by several shots from a B.A.R.! . . . Nothing moved in safety!

Despite the fact that we were miserable and living under the worst conditions, it was surprising to note the good spirit of most of us! We did a lot of wailing but we did a lot of laughing too! Most of us were assigned to duty — driving trucks clearing with bulldozers, unloading supplies at the beach, all the things that had to be done and done quick!

A few of us managed to rummage around for souvenirs — No Seabee's life is happy 'till he has a souvenir or two!

Thus we began our stay in the Marianas and although it was a rugged start, we were destined to move, before long, to our permanent camp. The site for this camp turned out to be one of the best on the Island and when we moved there, we boasted luxuries that many units did not have until months later! Our living quarters were five-man tents, grouped in orderly company areas! We had showers and heads! Our galley was the talk of the island. We soon had a laundry, ship's store, library, recreation hall and movie theater!

We now functioned as a unit and before long we were tackling the many construction jobs that we had been sent here to do!

We watched the war-torn island transform from a mass of wreckage to a thriving, orderly, forward base! We had entered on roads of mud and when we left we sped down modern paved highways! . . . And we were proud that we helped make it possible.

CONSTRUCTION ACTIVITIES

Above: A ripper tears up the stubborn coral so it can be handled by carry-alls.

Left: Angledozer and blasting crews start a deep cut for a future highway.

Below: Bulldozer clearing the dense jungle so surveying party can stake their line.

Grading . . .

. . . Our equipment operators, truck drivers, survey crews, blasting crews, mechanics, and maintenance men were the best to be had! . . . They proved it by building super highways through dense jungle, rocky mountains, or mud . . . No job was too tough to handle!

Above: This Quonset arrangement will house vital equipment! It was built in record time.

Right: Acres of floor space covered by huge warehouses. Note long retaining wall.

Below: Butler huts 'growing' where once grew nothing but jungle!

Building . . .

. . . Carpenters, plumbers, electricians, painters, steel workers — skilled workers of every trade erected buildings of every size and description! Huge camps, hospitals, storage areas—nothing was too difficult for their skill!

Above: Black-top spreader gang laying a modern asphalt pavement!

Left: Hot mix batch plant . . . It's capacity was doubled by our men to speed the finishing of important runways.

Below: Concrete finishers. Note the improvised 'b a t c h' truck!

Asphalt & Concrete

. . . Whether it was mixing asphalt, paving highways or building concrete walls — we had the men who could do the job and do it well! . . . Praise for their work came from many high ranking officials!

Above: Laying the second ring on gasoline storage tank.

Right: Running a pipe line to a tanker anchorage. Note the use of barrels to float pipe while it was being 'snaked' into place!

Below: Over mountains and thru jungles! This pipe line will carry gasoline for giant bombers!

Tanks and Pipelin

. . . Their job was vital and they did it well! Countless miles of pipeline were laid and tank after tank 'grew' by their skillful hands. They speeded the fueling of gasoline-hungry planes! They fought jungle, heat, torrential rain, mud and water to complete their jobs ahead of schedule!

CAMP ACTIVITIES

Church Call

Military necessity and a heavy work program does not leave a busy Seabee much time for Church Services, but given the opportunity, these typical American men displayed a very stable and devout spirit of religion.

The prolonged boat trip to the Marianas provided ample opportunity for religious services and the response was most edifying. The daily Bible classes and Prayer Meetings as well as Daily Mass were faithfully attended each day by hundreds of Seabees, Sailors, Soldiers and Marines on board ship. Sunday Mass and Services were in a class by themselves for the decks could hardly hold the crowds that attended.

That same fine spirit persisted after we arrived at our new home in the Marianas. The lack of church facilities in the bivouac area made little difference. At first we had to get along with packing cases and ammunition boxes for altar and pulpit. It was definite progress when a tarpaulin shelter was provided for the altar and pulpit even though the congregation was exposed to the rain and sun (both of which went to extremes in their own tropical way).

Finally our permanent camp was built and a Chapel was provided. The Seabees are not to be outdone in anything — not even in showing devotion to their faith. So the Chapel was built, and it was the 'best on the island' in those early days, for it was screened in, had a wooden deck and could seat over two hundred and fifty people. Of course it could not compare with the "cathedrals" which were built later in some of the camps throughout the island. However, it served our purpose well and accommodated a capacity congregation each Sunday. Not a day passed that the Chapel was not in use either for Sunday Services, Bible Classes, Sabbath Services, Daily Mass, choir rehearsals, special devotions or as a place of refuge and quiet for those who wished to pray or read the Scriptures.

The principal function of a Chaplain in the service, like that of a clergyman in civilian life is concerned with religious matters such as conducting Divine Services, administering the sacraments, administering to the sick and dying, giving instructions, etc. But, while a Seabee's work may be from

sun to sun, a Chaplain's work——! Well, the Chaplain soon finds out that his office has become a sort of clearing house for everything from gripes about the chow and looking up a long lost relative on the island to "I wanna go home!"

The Seabees are to be admired for volunteering their skills and services when it was not demanded of them. Their work in the field has been a constant source of amazement as well as admiration. It has been a distinct pleasure to be of service to them in any way. May God bless and protect the men of the 48th and their families.

Postoffice

. . . If you didn't get a letter your morale hit the deck but it wasn't the mailman's fault; this department handled seventy-five thousand letters a month! Money orders to the tune of one half million a year!!

Censors

. . . You mustn't write this and you can't say that! . . . These mates had sharp razor blades handy if you did! They scrutinized thirty thousand letters a month!

Exchange

. . . Not the place you ordered ice water, but the nerve center of the battalion! Hundreds of calls a day ranging from wrong numbers to top-secret orders!

Barber Shop

... Tonsorial artists who clipped half hundred heads of hair a day! Hair style trends depended on the 'scuttlebutt'! If it was good "just around the ears!" If it was bad! " . . . wack 'er off, Mac!"

Cobbler Shop

... Rundown footwear retreaded for a quarter! Their business was good. They saved forty soles a day! Sideline: upholstering truck and tractor cushions!

Laundry

... They did not deliver or iron but they washed (family style) two thousand pieces of clothes a day—and for free! The girls: Chamorros—not Seabees!

Theatre

. . . The most popular evening pastime. We took brief trips home via the flickers! Rain never thinned the audience! Hardest to take! air raid alarm in middle of shows! Easiest to take: pretty girls!

Projectors

. . . Started with one sixteen millimeter projector — changing reels evoked cries of "Fix it, Junior!" . . . Important addition: two new thirty five millimeter projectors and a booth!

Beer Garden

. . . Most popular rendezvous! Six cans of beer a week . . . each one a momentary respite from the cares of the day—favorite remedy for coral dust and tropical heat! Most heard query . . . "Have ya' got a beer chit?"

Recreation Hall

. . . Composing room for thousands of letters! — Phonograph records from Bach to Boogie! . . . Checker battles and momentous games of dominoes . . . Most popular card game: Rummy!

Library

. . . Not on the list of Carnegie foundations but one of our favorite refuges! Tent full of reading — from 'who done it' to Greek classics!

Ship's Store

. . . Merchandising mart from shoe strings to lighter flints! To get such an item as a fountain pen you stood in line hours early! Most popular item: Cigars!

Mess Hall

... You helped devour a million meals a year! Fresh meat was scarce but you helped do away with seven tons a month (we have no room to list the C-rations). Hardest to swallow: Spam and dehydrated spuds . . . !

Chow in the Field

... Served "Buffet Style" sans benefit of napkins and doilies! You washed it down with hot coffee and then took 'five!'

Scullery

... It's no easy job to wash thirty five hundred trays, four thousand coffee cups, twenty five hundred bowls and ten thousand pieces of silverware a day! Only reward: . . . dishpan hands!

COMPETITORS!

EASY AND HARD WAY

SCUTTLEBUTT

Sports and Recreation

As the dim outline of the Hawaiian Islands faded into the horizon, so ended one phase of the 48th sports activity! On the Island 'X' there, our baseball, softball, basketball and wrestling teams competed with the best — and win, lose or draw, they always gave a good account of themselves!

Aboard ship, on our voyage to the Marianas, our athletes contributed a 'lion's' share of the many athletic shows that helped break the monotony of the long wearisome journey. L

Under the broiling tropical sun on hatch number three, a boxing ring was set up. Captain Murray took over the mike as official announcer and from his vantage point on the bridge, conducted the bouts in his boisterous, good natured way! Marines, Seabees, Sailors and Soldiers slugged it out for the ship's championships. The spectators, yelling and shouting to show their enthusiasm, would forget to stay away from forbidden areas! At this point, Captain Murray would be heard — "Now be nice boys! . . . Let's get off that boom!" or "Come on there, Blondie, you know ya' ain't supposed to be on that life raft!" . . . And so it went from one day 'til the next until the tournament was over.

The 48th boxers gave a good account of themselves and walked away with top honors in many of the classes.

The 48th Wrestling Team also gave a good account of themselves aboard ship and provided many hours of welcome entertainment! A mat, devised from bunk mattresses and covered with canvas, became the arena for the 'grunt and groan' artists and their shows were eagerly received.

The "BEES"

Back Row — "Babe" Keller, Mgr.; Clay Odneal, p; Howard Beck, ump; William Jutsum, c; Emil Ross; James Bouchard, 1b; Chandler Jones; Mathew Rawluski, lf; John Carrick, ump.

Middle Row—John Simpson, p; Clyde Heller, 3b; Ezra Birkes, rf; Horace Coyne, cf; Robert Stangby; Fred Travers; Charles Manning, 2b; Thomas Ryan, ss; Carl Erickson.

Front Row — Aaron Siemsen, ump; Segundo, Mascot; Stanley Martin, c.

Not Present: Thomas Blair, c; Charles Gill, rf.

Basketball Court

When we first arrived in the Marianas, there was no time for sports. There was plenty of hard work to be done and we had our camp to build — and others as well. Eventually, though, we settled into a routine and once more all sports activities began to flourish.

The baseball team was the first to be 'rejuvenated.' A team was soon molded into one of the most potent 'nines' on the Island. Their field — at first nothing more than a sand lot — was groomed into first class condition with the cooperation of the grading department and before long the "Bees" were toppling crack teams from all over the island. Up 'til this writing their record speaks for itself — eighteen wins and two losses!

A softball team was next on the list and soon these boys had an organization that was

hard to beat! They played a busy schedule and can well be proud of their results!

For the first time since the Battalion had been formed, a Battalion basketball league was inaugurated! Six teams were organized and a basketball court was built! Rivalry was strong and the hoop artists had some exciting games.

The wrestling team again became active and before long was putting on exhibitions around the island.

Other recreation facilities provided were the horse shoe courts and ping pong tables! In the recreation tent there was an ample supply of games and many long hours were shortened here with checkers, chess, dominos and cards.

Last but not least was the ocean swimming and fishing! Some of the industrious built boats in their spare time and others spent many hours at the beach in search of shells to string into beautiful bracelets and necklaces!

Wood carving and trinket making absorbed many hours! The time spent on these hobbies can be termed 'well spent' for we know that a busy man is never as lonely as a quiet one!

Baseball Field

. . . A sandy, jungle area was cleared to provide this diamond! . . . Despite heat, rain, mud and dust, baseball was our favorite sport — both for participant and spectator.

Cover Floyd Goodan, Ptr2c

We sincerely hope that this book has met with your approval. It was issued to you through the cooperation of the 48th Battalion Welfare Department.

We have endeavored to give you a momento of your everyday life while you were a member of this Battalion — your work; the way you lived; your laughs and hardships!

We fully realize that this is by no means a complete record of the activities and accomplishments of the Battalion. It would have been highly desirable to display every unit and department that has made this Battalion a successful military and construction organization, but the lack of time, space and materials did not permit it. We trust that each of you will try to appreciate this fact and accept the book as an honest effort to bring you a lasting souvenir.

THE STAFF.

The Forty Eighth Naval Construction Battalion was commissioned on the 13th day of December, 1942. We arrived in Port Hueneme, February 8, 1943. We had our last glimpse of the United States on February 22nd. The Hawaiian Islands were a welcome sight ten days later. On the 24th of June, 1944, we boarded ship for transport to places unknown. We arrived within site of the Marianas Islands on August the fourth and went ashore ten days later. In April, 1945, we began our leaves home — via rotation.

Hear to the man called ^{ADAM} ~~Adam~~
 and the Beautiful ^{BEAUTIFUL} ~~Body~~ ^{Body} called ~~Body~~
 who has ^{WAS} ~~found~~ ^{filled} ~~was~~ ^{filled}
 with ~~Flowers~~
 and ~~Body~~ ^{was} ~~covered~~ ^{with}
~~leaves~~ ^{LEAVES}
 when ~~adam~~ ^{this} ~~saw~~ ^{this}
